

Map 12 - Carroll Creek Reroute at about km 5.5

2010 September 15

After crossing Carroll Creek the trail climbs an ATV / snowmobile trail for a short distance before heading north into a mature woodlot for approximately 600 m. The trail rejoins the ATV/snowmobile trail for a *short* distance again before heading back down to a meadow alongside the Grand River. From here it heads north again to join the existing trail at the bottom of the 3rd Line road allowance and heads into the Elora Gorge C. A. The overall length of trail is not changed. The 3rd Line Access Trail is increased by about 50 metres. For other reroutes consult <http://www.gvta.on.ca/trailchanges.html>.
