

Grand Valley Trails Association

Revision to Map 10

Section that has changed:

Black Walnut Section from km 32.9 to km to km 34.0

Effective April 2016

After turning right at Sims Estate, km 32.9, the trail follows a sidewalk past Sims Estate Place, past a limestone wall and over a drainage area with a guard rail. It continues as described in the guidebook until it turns right onto a segment of the Walter Bean Grand River Trail behind houses. *This is where the reroute starts:* After the last house, the trail turns left passing between houses to Edgewater Cres. The trail turns right along the sidewalk a short distance and past a private street. Just before 264 Edgewater Cres, it veers right for a few metres along a groomed path/sidewalk. At approximately km 34.0 (coordinates 43.443353, -80.405933), the trail now turns left along a multipurpose, stonedust trail and proceeds for about 400 m then veers right, across Idlewood Creek and on a steel bridge. After crossing the bridge, the trail veers right following the creek on the right for about 700 m and arrives at Woolner Trail, formerly Zeller Drive, formerly km 34.4 now km 35. Turning right, the trail descends to the end of Woolner Trail at the Grand River, where it turns left onto a crushed stone trail, which is part of the Walter Bean Grand River Trail. About 50 m along the crushed stone path, the GVT veers right along a footpath in a wooded area closer to the river. This reroute adds approximately 0.7 km to the main trail.

Online maps

Updated GVTA maps are available online on the Ondago app. Simply download the Ondago app, select the Grand Valley Trail maps from the catalogue and download the map you need. Online maps are interactive and show your progress as you walk along the trail. Once a map is downloaded, you do not require a data connection while walking the trail.
